

Mariam Moubarak Naeem

MACHINE LEARNING ENGINEER

Egypt | +20 110 049 7698 | mariammoubarak461@gmail.com | <https://github.com/MariamMoubarak55> | [linkedin.com/in/mariam-moubarak-naeem-b0bbb8310](https://www.linkedin.com/in/mariam-moubarak-naeem-b0bbb8310)

PROFESSIONAL SUMMARY

Machine Learning Engineer with hands-on experience building 2 applied Python-based AI systems and predictive models, including a bank churn predictor trained on 10,000 customer records (88% accuracy). Skilled in data preprocessing, feature engineering, model training, evaluation, and deployment workflows using scikit-learn, pandas, NumPy, Streamlit, InsightFace, OpenCV, and ONNX Runtime.

EDUCATION

Bachelor of Science in Computer Science | Assiut National University | 2023 – 2027

PROJECT EXPERIENCE & ACHIEVEMENTS

Face Recognition System | Python, InsightFace, OpenCV, ONNX Runtime | [GitHub](#)

- Developed a local face-recognition pipeline that collects webcam samples, generates 512-dimensional facial embeddings, and identifies known vs. unknown faces with 95% accuracy.
- Implemented a 3-step face-recognition workflow: webcam collection of 50+ face samples, embedding database creation, and real-time identification at under 100ms per frame.
- Integrated InsightFace, OpenCV, and ONNX Runtime for real-time face detection and recognition at 30 FPS.

Bank Churn Predictor | Python, Streamlit, scikit-learn, pandas, NumPy, Random Forest, joblib | [GitHub](#)

- Built 1 interactive Streamlit dashboard that predicts bank customer churn on 10,000 records, achieving 88% accuracy and 0.86 AUC with a Random Forest pipeline.
- Cut prediction latency by 80% (under 2 seconds) and preserved 88% model accuracy by serializing model and scaler.

AI & Machine Learning Portfolio | HTML, CSS, GitHub | [GitHub](#)

- Presented 3 completed projects — Artificial Intelligence, Machine Learning, and Web Development — in a fully responsive, mobile-friendly portfolio interface.

Machine Learning Program | Digital Egypt Pioneers Initiative (DEPI) | 2026 – Present

- Applying supervised and unsupervised learning, data preprocessing, feature engineering, and model evaluation across 3 hands-on projects in a 4-month program.

Machine Learning Case Studies | CIB Training Program | 2026 – Present

- Strengthening data analysis, predictive modeling, and Python workflow skills through 5+ business-oriented Machine Learning case studies.

SKILLS

Machine Learning & AI: Supervised Learning, Unsupervised Learning, Classification, Random Forest, Face Recognition, Feature Engineering, Data Preprocessing, Model Evaluation, Predictive Modeling

Python & Data: Python, pandas, NumPy, scikit-learn, Streamlit, joblib, Jupyter Notebook, Statistics, Data Analysis

Computer Vision: InsightFace, OpenCV, ONNX Runtime, Facial Embeddings, Real-Time Recognition

Databases & Programming: SQL, MySQL, Java, C++, Data Structures and Algorithms, Object-Oriented Programming

Web & Tools: HTML5, CSS3, Responsive Web Design, Flexbox, CSS Grid, Git, GitHub, VS Code

Professional Skills: Analytical Thinking, Structured Problem Solving, Communication, Collaboration, Initiative, Adaptability, Attention to Detail, Continuous Learning, Time Management

COURSES & CERTIFICATIONS

- Machine Learning Training (Ongoing) | National Telecommunication Institute (NTI) | Jun 2026 – Present
 - Studying supervised and unsupervised learning, data preprocessing, model training, and evaluation using Python on real datasets.
- SQL Basic & Intermediate Certificates (2 of 5 HackerRank certifications) | HackerRank | 2025
 - Learned writing SQL queries with joins, aggregations, and subqueries to analyze and manage relational databases; passed both certification exams.
- Python (Basic), CSS (Basic), and Problem Solving (Basic) Certificates | HackerRank | 2025
 - Covered Python syntax and data structures, CSS styling fundamentals, and algorithmic problem solving; passed 3 HackerRank skill assessments.
- Introduction to Web Technologies Program (60 hours) | ITI | 2024
 - Learned HTML, CSS, and web development fundamentals through 60 hours of structured, hands-on training.
- Front-End Web Development Diploma | SEF Academy | 2024
 - Built responsive web pages using HTML5, CSS3, Flexbox, and CSS Grid, and applied them in a fully responsive portfolio project.
- Certificate of Appreciation – Mentor | Training Program | 2026
 - Guided and supported 10+ trainees through Python and Machine Learning tasks in recognition of mentoring contributions.
